## Risks

- **The Fund may not achieve its investment objective and the value of shares in the Fund may fall.**
- Neither First Trust Global Portfolios Management Limited ("FTGPM") nor any of its affiliates, guarantees the performance or the future returns of the Fund.
- The Fund may be subject to internet companies risk. Internet companies are subject to rapid changes in technology, worldwide competition, rapid obsolescence of products and services, loss of patent protections, cyclical market patterns, evolving industry standards, frequent new product introductions and the considerable risk of owning small capitalisation companies that have recently begun operations.
- The Fund may be subject to Chinese investment risks, including risk related to variable interest entities ("VIEs"). In China, direct ownership of companies in certain sectors by foreign individuals and entities is prohibited, and VIE structures are put in place to allow indirect foreign investment, including an investment by the Fund. Although VIEs are a longstanding industry practice and well known to officials and regulators in China, VIEs are not formally recognized under Chinese law. Intervention by the Chinese government with respect to VIEs could cause the market value of the Fund's associated holdings to suffer significant, and possibly permanent, effects which could negatively impact the Fund's Net Asset Value and could result in substantial losses. Further, it is uncertain whether any new laws, rules or regulations relating to VIE structures will be adopted or, if adopted, what impact they would have on the value of a Fund's shares.
- There is no assurance that the Index will continue to be calculated and published on the basis described in the Prospectus. In addition, the Fund's return may not match the return of the Index.
- See also the description of the risks applicable to the Fund in "Risk Factors" in the prospectus.
